LANGUAGES

- English (Native Level)
- Japanese (Limited Working)
- Spanish (Native Level)
- Portuguese (Working Proficiency)

EDUCATION & CREDENTIALS

- AI Software Full-Stack Development
Le Wagon Tokyo · 2025 – 2026 · Graduated March 2026
- MA Financial Management - Merit
Durham University (United Kingdom) · 2011 – 2013 · Graduated with Merit
- BBA Finance - Honors
Al Yamamah University (KSA) · 2007 – 2010 · Graduated with Honors (Magna Cum Laude)

CERTIFICATES

- Backend Development (Python)
Boot.dev 2024
- Machine Learning Core Modules: Linear regression, Logistic regression and Numerical data
Google 2024
- Agile Project Management
Google 2023

SELECTED PROJECTS

- Forecast Alpha

SAAS | AI | FULL-STACK

AI-powered operational intelligence platform for connected business data. Built full-stack systems including OAuth authentication, AI-generated KPI recommendations, anomaly detection, forecasting, dashboards, alerts, onboarding workflows, and multi-source integrations.
- Kifor Match

FULL-STACK

Designed and developed a role-based donor/charity management platform including request workflows, offer approvals, and inventory-style fulfillment tracking.
- Stock Forecasting LSTM System

DATA / ML

Time-series forecasting system using LSTM networks, combining feature engineering with automated prediction pipelines. Built with TensorFlow/Keras and Pandas.
- AI Personal Assistant

FULL-STACK | AI

AI meeting and knowledge assistant with transcription, memory, summarization, and contextual Q&A. Designed as a foundation for personal productivity automation and meeting intelligence workflows.
- Portfolio

Production projects, live demos, and engineering portfolio.

PROFILE

Full-Stack Software Engineer with a background in consulting, finance, and enterprise operations, including experience at Accenture and PwC. After more than a decade solving complex business problems, I transitioned into software engineering and now build AI-powered SaaS platforms, scalable backend systems, APIs, and data-driven applications. Currently building Forecast Alpha, an operational intelligence platform for connected business data.

TECH STACK

- Languages

Python Ruby JavaScript SQL
- Frameworks

Rails Flask FastAPI Bootstrap Next.js Tailwind CSS
- Data & ML

Pandas NumPy Scikit-learn Prophet TensorFlow
- Cloud & Tools

Docker Git GitHub Linux Heroku GC Supabase

EXPERIENCE

- Forecast Alpha – Technical Founder & Full-Stack Engineer

2024 – Present

- Built full-stack applications using Python and Ruby on Rails.
 - Designed APIs and data pipelines for scalable analytics systems.
 - Developed ML-driven forecasting and anomaly detection tools
 - Managed deployments using Docker, AWS, and GCP.

Kifor (Japan)
 - Fullstack build of a charity/donor matching system.

Nexus Tours (Mexico)
 - Built anomaly detection system on transactional data.
 - Identified 3 confirmed fraud cases.

Pulse Labs – Google Workspace AI Program
 - Developed internal data automation tools (.gs, .js).
 - Processed datasets for AI model evaluation.
- Localiza & Co – PMO Expansion Mexico

2023 – 2024

- Enabled 16 office openings through PMO implementation.
 - Built Power BI dashboards for executive KPI tracking.
- Hertz – General Manager, Operations

2020 – 2023

- Improved NPS and market share through data-driven operations.
 - Optimized workflows across regional operations.
- UNIFIN – Regional Business Intelligence Manager

2018 – 2020

- Designed Power BI dashboards driving sales and credit insights.
 - Delivered strategic insights across multi-state operations.
 - Improved lead quality through data acquisition and cleansing.
 - Led training programs to enhance team performance.
- Accenture – Finance & Enterprise Performance, Consultant

2016 – 2018

- Delivered RPA solutions reducing finance OPEX (Blue Prism, Automation Anywhere).
 - Led SAP implementation across enterprise finance processes.
 - Streamlined workflows and automation opportunities across teams.
- PwC – Management Consultant

2012 – 2014

- Established PMO for Saudi government entity aligning strategy and governance.
 - Designed project governance frameworks and reporting structures.
 - Delivered executive-level stakeholder reporting and insights.
