HISHAM KHASHMAN

Full-Stack Engineer | Backend & AI Powered Systems

Ex-PwC, Accenture | Python | Ruby on Rails | FastAPI | SQL | Linux

hisham.khashman@gmail.com

Tokyo, Japan

LANGUAGES

English (Native) · Japanese (Limited Working) · Spanish (Native) · Arabic (Native) · Portuguese (Working Proficiency)

EDUCATION & CREDENTIALS

AI Software Full-Stack Development Bootcamp
Le Wagon Tokyo · 2025 – 2026 · Graduated March 2026

MA Financial Management - Merit
Durham University (United Kingdom) · 2011 – 2013 · Graduated with Merit

BBA Finance - Honors
Al Yamamah University (KSA) · 2007 – 2010 · Graduated with Honors (Magna Cum Laude)

CERTIFICATES

Backend Development (Python)
Boot.dev 2024

Machine Learning Core Modules: Linear regression, Logistic regression and Numerical data
Google 2024

Agile Project Management
Google 2023

SELECTED PROJECTS

Kifor Match

FULL-STACK

Full-stack platform for a Japanese non-profit client, developed a charity-donor matching system, including request management, offer workflows, and role-based access. Built with Ruby on Rails

Stock Forecasting LSTM System

DATA / ML

Time-series forecasting system using LSTM networks, combining feature engineering with automated prediction pipelines. Built with TensorFlow/Keras and Pandas.

LinguaLogic

FULL-STACK

Full-stack educational platform with authentication and gamified learning mechanics designed to make coding interactive and engaging. Built with Rails and phaser.js

PROFILE

Full-stack engineer and former management consultant with 10+ years of experience delivering data-driven solutions across consulting and industry. Specialized in building Software, Web Apps, AI-powered tools, APIs and analytics platforms that support real business decision-making. Combining strong business acumen with hands-on engineering across Python, Ruby, and cloud environments.

TECH STACK

Languages
Python · Ruby · JavaScript · SQL

Frameworks
Rails · Flask · FastAPI · Bootstrap · Stimulus · Turbo

Data & ML
Pandas · NumPy · Scikit-learn · Prophet · TensorFlow

Cloud & Tools
Docker · Git · GitHub · Linux · Heroku · GCP · AWS

EXPERIENCE

Independent Consultant & Full-Stack Engineer — 2024 – Present

- **Built full-stack applications** using Python and Ruby on Rails.
- **Designed APIs and data pipelines** for scalable analytics systems.
- **Developed ML-driven forecasting and anomaly detection tools**
- **Managed deployments** using Docker, AWS, and GCP.

Kifor (Japan)
- Fullstack build of a charity/donor matching system.

Nexus Tours (Mexico)
- Built anomaly detection system on transactional data.
- **Identified 3 confirmed fraud cases.**

Pulse Labs – Google Workspace AI Program
- Developed internal data automation tools (.gs, .js).
- Processed datasets for AI model evaluation.

Localiza & Co – PMO Expansion Mexico — 2023 – 2024

- **Enabled 16 office openings** through PMO implementation.
- Built Power BI dashboards for executive KPI tracking.

Hertz – General Manager, Operations — 2020 – 2023

- **Improved NPS and market share** through data-driven operations.
- Optimized workflows across regional operations.

UNIFIN – Regional Business Intelligence Manager — 2018 – 2020

- **Designed Power BI dashboards** driving sales and credit insights.
- Delivered strategic insights across multi-state operations.
- Improved lead quality through data acquisition and cleansing.
- Led training programs to enhance team performance.

Accenture – Finance & Enterprise Performance, Consultant — 2016 – 2018

- **Delivered RPA solutions reducing finance OPEX** (Blue Prism, Automation Anywhere).
- **Led SAP implementation** across enterprise finance processes.
- Streamlined workflows and automation opportunities across teams.

PwC – Management Consultant — 2012 – 2014

- **Established PMO for Saudi government entity** aligning strategy and governance.
- Designed project governance frameworks and reporting structures.
- Delivered executive-level stakeholder reporting and insights.
